Controlling movements with the LMS
accurate - robust - custom-fit

The Linear Magnetic Scale is the basis for highly accurate incremental and absolute magnetic measurement systems. The LMS can be encoded with one or multiple tracks and with or without reference. The magnetization process - which has been developed and patented by BOGEN - writes the magnetic poles with an exceeding accuracy referring to width and position. The LMS is resistant against environmental influences like production residues, utilities, vibrations etc. The operating temperature range goes from -20°C up to +100°C. With different accuracy classes up to ± 3 µm BOGEN offers linear magnetic scales for all needs of customers´ applications. The LMS can be used in any kind of industrial applications like automation technology, robotics, machanical and electrical engineering etc. Please don´t hesitate to contact our application engineers if you have special requests which are not listed in this data sheet.

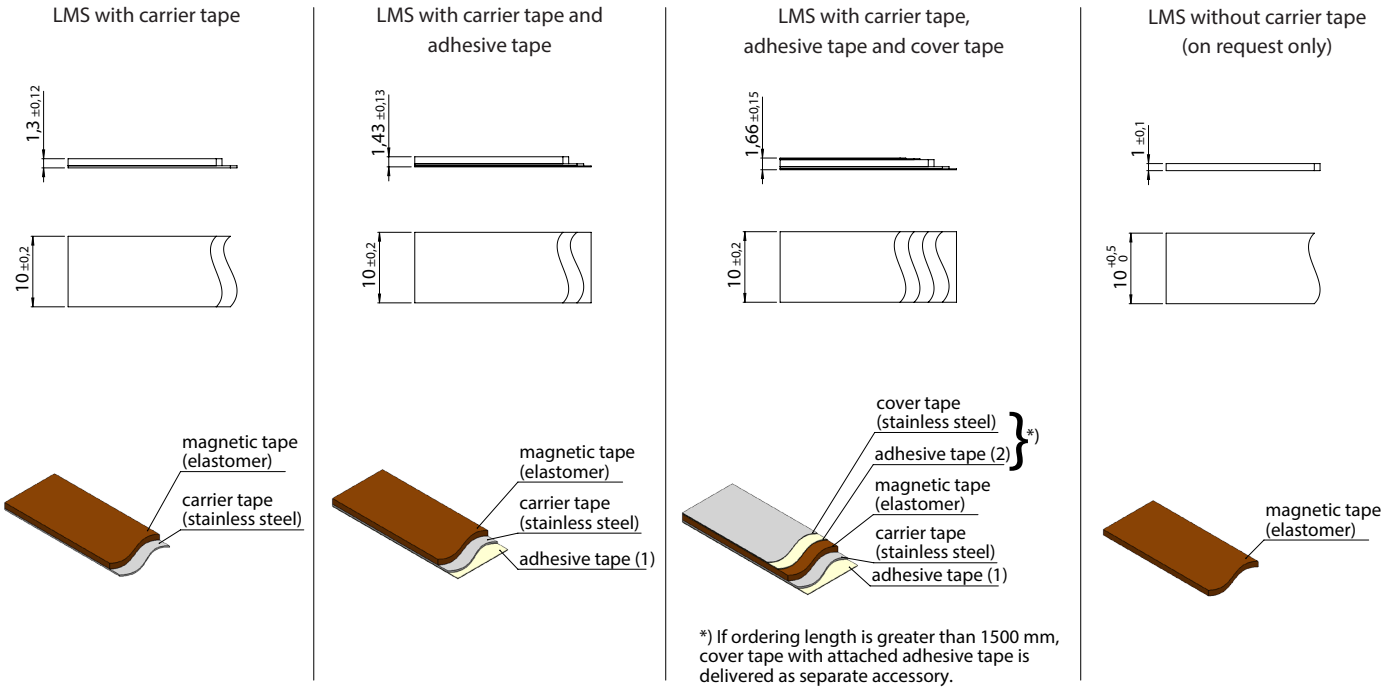
Scale Dimensions with Standard Layer Stackup



*) If ordering length is greater than 1500 mm, cover tape with attached adhesive tape is delivered as separate accessory.

Scale Dimensions with optional Layer Stackup [1]

For individual scale setups following layer dimensions can be used

Magnetic tape	0.5 mm or **1.0 mm**
Carrier tape	0.1 mm or **0.3 mm**
Adhesive tape	**0.13 mm**, 0.212 mm or 0.050 mm
Cover tape	0.076mm, **0.1 mm,** 0.15mm

Length

Linear magnetic scales cut in pieces or supplied on reel

Marking [2]

The marking distance is 250 mm and builds up as follows:
accuracy class . pole pitch [µm] . year/week . reel no. . magnetic strip counter (optional)
e.g. A20.2000.1605.19 (marking every 250 mm)
A20.2000.1608.19.012 (marking one time per magnetic strip)

[2] The magnetic strip counter indicates the number of remaining strips on the reel. The strip is marked only once per length.

Optional Accessory

Extruded aluminum profile (please contact our application engineers for the right profile for your LMS)
Scale applicator (for easy and precise installation of the scale)
