

## Rotary Magnetic Scale Nonius RMSN64-63-1.28-E-S

Outer diameter: 50.55 mm  
Number of pole pairs: 64-63  
Surface of magnetisation: Radial  
Pole pitch (master track): 1.28 mm  
Magnetisation material: Elastomer bonded ferrite (E)  
Hub material: Steel (S)  
Accuracy class: standard 300 Arc sec  
Protection: Without protection

### Technical characteristics

- Magnetic Rotary Scale
- Robust, magnetically encoded ring
- For absolute measuring
- True angular division
- High accuracy

### Benefits

- Non-contact, quick position measurement
- Perfect angular division
- 100% quality checked
- Wearless
- Resistant to dust, cooling lubricant emulsion, oil, etc.
- On request with quality protocol
