

Rotary Magnetic Scale Nonius RMSN64-63-1.50-F-A

OuterØ: 59.52 mm; InnerØ: 35 H7 mm;
Height: 7.5 mm
Number of pole pairs: 64-63
Surface of magnetisation: Radial
Pole pitch (master track): 1.50 mm
Magnetisation material: Hard ferrite (F)
Hub material: Aluminium (A)
Accuracy class: 300 (G)
Protection: Without protection

Technical characteristics

- Magnetic Rotary Scale
- Robust, magnetically encoded ring
- For absolute measuring
- True angular division
- High accuracy

Benefits

- Non-contact, quick position measurement
- Perfect angular division
- 100% quality checked
- Wearless
- Resistant to dust, cooling lubricant emulsion, oil, etc.
- On request with quality protocol
