

Rotary Magnetic Scale Nonius RMSN32-31A-1.50-F-A

OuterØ: 34 mm; InnerØ: 19 mm H7; Height: 6 mm

Number of pole pairs: 32-31

Surface of magnetisation: Axial

Pole pitch (master track): 1.5 mm

Magnetisation material: Hard ferrite KR210 (F)

Hub material: Aluminium hub N165 (A)

Protection: Without protection

Technical characteristics

- Magnetic Rotary Scale
- Robust, magnetically encoded ring
- For absolute measuring
- True angular division
- High accuracy

Benefits

- Non-contact, quick position measurement
- Perfect angular division
- 100% quality checked
- Wearless
- Resistant to dust, cooling lubricant emulsion, oil, etc.
- On request with quality protocol
