

Counting

Controlling

LMSBI Linear Magnetic Scale Bar Incremental

- Linear applications
- Different scale materials available
- Different pole pitches

Features

- From low to very high accuracy producible on demand
- One or multiple track magnetization
- Different scale geometries
- Customizable for many applications
- No attrition from usage
- Resistant to dust, cooling lubricant emulsion, oil, etc.
- Wide range of selectable magnetic scale characteristics
- A variety of magnetic materials for several applications

**Simple solutions with the LMSBI
fixed – precise – economic**

BOGEN produces magnetic scales and suitable accessories for a big variety of different applications. The magnetic scale incremental bar can be attached with a scale written with one track or multiple tracks. Using different accuracy classes scales can be tailored to the requirements.

Linear Magnetic Scale Bar

Scale Bar Properties

Material ^{*)}	Cover tape: stainless steel Steel bar: steel Magnetic tape: elastomer bonded ferrite Sealing: silicon adhesive
Resistance to environmental influences	tbd
Magnetic flux density	tbd
Temperature range	tbd
Resistant to dust, cooling lubricant emulsion, oil, etc	tbd

^{*)} please handle with gloves only (for rustproofing)

Dimensions

Optional Accessory

- clamping claws (on request)

Order Code

Parameters

LMSBI -

P	Z	L	A
---	---	---	---

			Code	Explanation ⁽¹⁾
Parameters	P	Pole Pitch (mm)	P ...	0.5 to 2 mm (in steps of 0.01 mm)
	Z	Reference Track		without reference track
			Z	with reference track
	L	Bar length (mm) ⁽²⁾ ⁽³⁾	L500	500 mm
			L1000	1000 mm
			L1500	1500 mm
			L2000	2000 mm
	A	Accuracy Class	A03	± 3 µm/m
			A10	± 10 µm/m
			A20	± 20 µm/m

⁽¹⁾ standard parameters are bold ⁽²⁾ measurement length = bar length - 10 mm ⁽³⁾ for lengths over 1300 mm extra freight charge will be billed

Ordering Example

LMSBI-P1.5ZL1000A20

Linear Magnetic Scale Bar Incremental, pole pitch 1.5 mm, with reference track, bar length 1000 mm, accuracy class ± 20 µm/m
